Dear FCC:

I am writing to enter my objection to the National Associations of Broadcasters petition 04-160. As a subscriber of XM Radio satellite service I have come to rely on the local traffic reports. I travel the Richmond, DC, Baltimore, Philadelphia corridor weekly. The satellite traffic reports are superior to anything offered by local broadcasters: indepth reports when I need them. I plan my travel based on the information.

Please do not enact regulation that will end or hinder this valuable service.
